Tomiwa Adedokun

To Whom It May Concern

Lagos state,
Nigeria.
100001

Good day,

My name is Tomiwa and I am a software engineer. I have been developing and deploying AI models and applications for about 3 years. Most of my experience lies in artificial intelligence, Data science/machine learning, cloud infrastructure/services and linux server administration. I have also worked with HTML/CSS, Javascript/NodeJS, PHP, some scripting languages like Python and a little bit of C++.

While I am not actively searching for a position, I heard that there are some Software Engineering positions that are available and that happens to be the same direction that I want to take in my career.

You will find high level summaries of my job duties/education history in my resume. If you want to see some of the projects that I work on in my spare time, check my GitHub profile: https://www.github.com/extomvi and my LinkedIn profile: https://www.linkedin.com/in/tomiwa-adedokun-excellence/

If you check out my github, it is mostly projects that were implemented. I do not feel that they are accurate representations of the quality of work that I bring as a full time employee but it will give you a sense of the technologies that I work with frequently. Most of my work has not been open sourced unfortunately. However, I would be excited to join your organization to work with you and apply my skills.

Sincerely,

Tomiwa Adedokun
